High level tasks

BATOC RT 66 Meeting Notes 9-5-17

ROUTE 66 MEETING NOTES 9/9/17

Overview:

We have made good progress on the itinerary and much work is still going on. Much of this meeting was focused on in identifying next steps and setting other priorities. We identified multiple high level tasks the need focus or feedback. Special attention was given to the Charity, tie-in, external contact and club contact portions of the trip.

Notes:

Transport – Bud has found one additional transport but it was \$2100/car. The search continues.

The Cummins have a friend who transports cars frequently and will find the name of the company he uses. West Coast shipping <https://www.wcshipping.com/> (510) 236-3008, Mon- Fri 8-5, talk to Alex, mention Gary Larson.

Dealer tie-ins – Dave will work on developing dealer and manufacturer tie-ins

Charity – Dave will lead a committee to identify and develop the charity aspect of the trip.

Several charities were discussed:

- Foster Kids
- Native American children's school
- Antique car restoration school (McPherson College)
- Elder care
- Alzheimer research/care
- Red Cross
- Hurricane relief
- St Jude's Children's hospital

None was chosen. We had discussion around the public perception of our choice of charities and whether the charity could be too big to have interest in our mission. St Jude's was discussed at some length. No decision was made,

We discussed a Drive-a-thon approach where in contributors would commit some amount such as \$.25/mile to our chosen charity. No decision was made.

BATOC RT 66 Meeting Notes 9-5-17

Contributors discussed include:

- Ford
- Ford dealers
- NAPA Auto Parts

Communication:

We discussed contacting CTCI and other car clubs along the route to join us at the stopping points. Guy accepted the task of finding and directly communicating with those organizations. Jean took a task to provide a write up for the Early Bird.

We noted the need to develop a way to accept donations for our charity on-line while insuring all proceeds go direct to the charity. We also need to develop a mechanism to accept Cash donations.

We agreed that a “live” on-line BATOC route 66 tracking mechanism is needed. This idea needs development.

We discussed windshield flyers a way to solicit donations along the trip.

Safety:

The committee discussed the need for live car to car communications during the trip. Notes was the distance limitation of the walkie-talkies and the limitation of celular coverage as well as its inability to communicate to the group simultaneously.

A decision was made to require drivers to carry a CB radio such as this \$79 [Midland integrated kit](#) or this \$38 [Uniden PRO505XL 40-Channel Bearcat Compact](#) with external antenna

Schedule:

The committee agreed to move the schedule one week earlier to help avoid weather issues and allow us to be in ABQ during the balloon festival. This is contingent on getting hotel space in Santa Fe and ABQ for the dates below.

Revised I Schedule 10/13 – 10/22/18

<u>DATE</u>	<u>CITY</u>	<u>HOTEL</u>	<u># OF NIGHTS</u>	<u>From here to NEXT STOP</u>	<u>EST'D TIME</u>
